Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on February 5, 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claims 1-17 are presented for examination.

Applicant's response to the restriction requirement filed on February 5, 2007 is acknowledged. Accordingly, Applicants elect Group I the compound with traverse. Applicant asserts that Group I and Group II should be rejoined and examined on their merits. Claims 1-17 are not in condition for allowance and, therefore, the claims of Group I will not be rejoined with the claims of Group II. The two groups are related as product and process of use, and the product as claimed can be used in various materially different processes, such as, for example, to enrich a natural extract to reduce or treat oxidative damage to DNA in mammals. Therefore, the groups are maintained as patentably distinct inventions and, absent factual evidence to the contrary, the restriction requirement between the two groups is still deemed proper and is made final. Claims 10-17 are withdrawn from consideration as being directed to non-elected subject matter. Claims 1-9 read on the elected invention and are herein examined on the merits.

Applicant's Information Disclosure Statements (IDS) filed 3/22/2004, 07/06/2004, 08/09/2004, and 12/08/2005 have been received and entered into the application. As reflected by the attached, completed copies of form PTO/SB/08, the Examiner has considered the cited references.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 2, 3, & 8 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The phrase "less than about" fails to set forth a lower limit for the concentration of the agent. Such phrase covers 0% of the agent in the composition. The word "less than" conflicts with the word "about", both of them cannot be used in the same phrase.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Oliveira et al. (US Pub. No. 2003/0157239 A1).

Oliveira et al. teach a composition that has high protein, low soluble-sugar, oil containing soybean meal suitable for use as a partial or full replacement of fish meal and other protein and energy sources in the manufacture of fish and land animal feeds and pet foods. This syrup is also suitable to be used as a taste enhancer for animal feed (typically added to the soybean meal) (see abstract). The soybean meal of this invention also is useful as a protein and energy source in other manufactured animal

feeds, such as shrimp, piglets, calves and pet animals (for example, cats and dogs) (see page 4, paragraph 0040). Oliveira et al. further teach using 25.7 mg of astaxanthin per 1883.0257 g composition, which corresponds to 0.00136% weight of the composition (see page 6, table 2). The reference anticipates the claims.

Conclusion

No claim is allowed.
